

## Digital display

LifeSafer ISA comes with essential safety features and flexible settings that can be tailored to match your program.

An optional display keeps you informed with real time speed information.

### Speed limit changes

- **Red** signals a **lower** speed limit ahead.
- **Green** signals a **higher** speed limit ahead.

### Speed limit tolerance

- **Yellow** signals when the vehicle is above the current speed limit but remains within a **preset speed tolerance**.

### Optional override

When enabled, the override button lets you temporarily exceed the speed limit under predefined conditions - such as limited duration and restricted number of uses per trip.

## Get started with LifeSafer ISA

### Fast installation appointments

We make installation quick and easy—helping you get on the road in as little as 20 minutes.

### Dedicated customer service

We're here to help anytime—24 hours a day, 7 days a week, all year long.

### Committed to your success

From setup to support, our experts are with you every step of the way.

# User guide

## How does Intelligent Speed Assistance™ (ISA) work?

LifeSafer ISA is an aftermarket vehicle safety device that reduces speeding.

The device uses vehicle location and smart technology to know the local speed limit and adjust accordingly—whether you're traveling on highways, city streets, or neighborhood roads.

ISA devices encourage safe driving behavior and reduce the risk of speed-related injuries and fatalities.

### LifeSafer is an authorized ISA provider.

Our devices are certified and installed by trained experts.

### ISA is easy to use.

After your device is installed, simply drive, stay within speed limits, and have it removed once your program is complete.

### ISA is effective.

Our programs teach proper speed habits to help establish long-term safe driving behaviors.
